

JOB DESCRIPTION

Junior Web Developer

Lancashire / Remote - Kickstart Scheme - 6 month placement

Noble Digital is looking to hire a Junior Web Developer to assist with the design and implementation of user-friendly, attractive websites for our clients.

You will be tasked with various projects to help with the design and maintenance of client websites, managing the content using our Content Management System (CMS) of choice - Wordpress - and performing key updates and maintenance.

To get the most from this role, you should have an interest in the workings of the internet, a desire to expand your knowledge and be passionate about technology and its potential to be a force for good.

Responsibilities

- Assisting with the design of websites, from early stage ideas and concepts to high-fidelity page designs
- Contribute to the delivery of new websites, including the building of web pages
- Making content updates and configuration changes to client websites
- Performing key maintenance, including updating Wordpress Content Management System (CMS) core, site themes and plugins
- Produce web solutions which meet the requirements of both the client and end-user
- Troubleshooting client websites and assisting clients in handover procedures
- Writing technical documentation

Skills & Experience

Must have

- A passion for web design and a desire to expand your knowledge of different technologies, user behaviours, programming languages and CMS systems
- Strong computer literacy & IT competence
- Good communication skills and attention to detail
- Proactive attitude and ability to manage your time effectively
- Good understanding of websites and the internet, including architecture and aesthetics

Nice to have

- Any digital or website project you can showcase at interview
- Working knowledge of, or experience with Wordpress
- Experience designing and developing responsive design websites
- Ability to convert comprehensive wireframes into working site pages
- Working knowledge of front-end technologies including CSS3, JavaScript, HTML5, and jQuery
- A passing understanding of back-end databases & SQL
- Experience with debugging tools such as Chrome Inspector / Firebug
- Knowledge of code versioning tools including Git, Mercurial, or SVN
- Understanding of PHP back-end development
- Knowledge of interaction with RESTful APIs (JSON, XML)

Eligibility Criteria

- Aged 16-24
- In receipt of Universal Credit

About us

Noble Digital is a multi award-winning digital agency founded on a single premise – websites can be **better**. They can work better for their users, they can be easier for their owners to maintain, and we've all seen a few that could look nicer too.

We're committed to doing things the right way. Our focus on User Experience allows us to create stunning and effective solutions that work for our clients and their customers.

We're a startup now in our third year, looking to expand our small team off the back of strong performance. This presents exciting opportunities for the right candidate who takes the initiative to gain exposure to the complete website lifecycle. You will learn about the inner workings of a digital business, and there is potential for the role to grow with you, to reflect your skills and interests.

Benefits:

- Flexible working hours and holidays
- Remote working
- Opportunities to learn and grow
- Use of necessary equipment provided including laptop and phone

We work with a Philosophy in mind, which is a promise not just to our customers, but also our employees.

THE SMALL PRINT

Strictly no CVs or phone calls from recruitment agencies.

Noble Digital Limited is an Equal Opportunities employer and welcomes applications from all candidates regardless of colour, race, religion, nationality, ethnic or national origin, gender (including gender reassignment), sexual orientation, age, marital status or disability.
